EDUCATION

Freshman@ University of Washington | Seattle, WA

Sep. 2026 - June 2030

Intended B.S. in Computer Science, Minors in Data Science (pre-major)

IBDP (INTERNATIONAL BACCALAUREATE DIPLOMA PROGRAMME)

2024 - 2026

TECHNICAL SKILLS

Languages (ordered by proficiency): Python, JavaScript, Solidity, Swift, TypeScript, SQL

Tools and Frameworks: Next.js, FastAPI, Streamlit, Node.js, Firebase, Supabase, MySQL, Figma, PyTorch, Git

AI Proficiency: Claude Code, OpenAI Codex, Cursor, Antigravity, etc

RELEVANT EXPERIENCE & RESEARCH

Fintoo

June. 2026 - Present

Intern

- Currently working as an **Artificial Intelligence Intern** where I am implementing LLM-based recommendation features for retirement and financial planning. Working on their latest mobile app (app store + google play store)

SDAI Synergy Digital | Mumbai

March 2025 -May 2025

Intern

- I worked with the Co-Founder. During this time, I was involved in a key data science project focused on developing a **Renewal Payment Propensity Model** leveraging a data lake platform(mCube.ai). My work was aimed at predicting customer renewal likelihood by analyzing a wide spectrum of parameters, including personal, transactional, occupational, locational, and behavioral attributes.

IJFMR - [Effect of UPI Adoption on Savings Behaviour of Indian Households](#)

Sep. 2025 - Dec. 2025

Independent Researcher

- Published Research where I tested whether higher UPI adoption leads Indian households to invest more in shares and debentures. Data Analysis and scraping using **Python**
- Using a **difference-in-differences model** on NSS household data from 2003 to 2019, combined with district-level PhonePe transaction volumes across 232 districts, the answer was clear: it doesn't. The effect on formal securities markets was statistically insignificant.

PROJECTS & AWARDS

Canadian Coding Competition | By University of Waterloo

2025

- Achieved a score of 73/75 - highest score in the history of my high school
- Awarded Distinction for being the **top 10% in the world** to achieve this score

CathCon (Hackathon)| By The Cathedral and John Cannon Senior School (mumbai)

2024

- Awarded Distinction for being the **top 10 in the hackathon** to achieve this score, Around 150+ participants

NBA AI prediction and analytics model | Personal Project

May 2026

- A real-time **Python** NBA game analytics dashboard built with **Flask** and **Socket.IO**. It ingests live play-by-play data, runs an **XGBoost** shot-quality model and a **PyTorch** win-probability model, and renders a single-page dashboard with playoff standings, player/team profiles, and contextual news. *Currently maintaining it using claude code routine tasks* (<https://github.com/saiompatro/NBA-AI>)
